Chairman of EDF Guideline Committee:

PD Dr. Alexander Nast, Berlin (Germany)

Expiry date: 07/2017

1. Definition

Hidradenitis suppurativa / acne inversa (HS) is a chronic, inflammatory, recurrent, debilitating skin disease of the hair follicle that usually presents after puberty with painful, deep-seated, inflamed lesions in the apocrine gland-bearing areas of the body, most commonly the axillae, inguinal and anogenital regions

2.2. Classification and severity
