This paper outlines our 2019/20 operational plan to embed a quality improvement approach, to deliver the quality improvement elements of our improvement strategy.

This plan will deliver the following six key objectives during 2019/20:

- 1 To embed quality improvement into Trust leadership & governance
- 2. To adopt and socialise a common and easy to use quality improvement methodology
- To provide tools and techniques to support staff in leading quality improvement initiatives
- To provide support, expertise and training in quality improvement
- To embed a quality improvement approach into day to day activities
- To reward and share good practice and evaluate progress.

The Workforce Committee and the Clinical Governance Committee will jointly oversee the Quality Improvement agenda and will receive regular progress updates.

Board Assurance Framework - Strategic Priorities

Quality Improvement – Operational Plan 2019/20

additional resource requested. This has prompted a review of our proposed approach to quality improvement considering the current financial constraints the Trust is operating within.

- 2.7 In December 2018 the Trust underwent a CQC Well-Led review and in their subsequent feedback the CQC clearly identified that additional work to embed a quality improvement approach in the Trust is needed. They also recommended that an executive lead be identified, to champion and drive quality improvement at senior level.
- 2.8 In January 2019 a new Director of Transformation officially started in post, and is now appointed to take the lead in embedding a quality improvement approach throughout the organisation.
- 2.9 Conversations are underway with Banes, Swindon & Wiltshire STP partners to ascertain opportunities for a long term strategic partnership to support continuous quality improvement; and this approach will form part of our wider strategy.
- 3.0 Aims and objectives
- 3.1 To meet our full potential we need to make 'making improvements' an intrinsic part of everyone's job, every day, in every part of the organisation. We want our staff to be open to try new things and for our leaders and managers to offer support with a collaborative and coaching approach. We want our staff to be empowered to act at the top of their game and take ownership for improving things within their control.
- 3.2 This requires a shift in our culture, our mind-set, in the way that we lead and the way we all go about our day to day business.
- 3.3 This plan aims to support us in achieving this aim by delivering the following six key objectives during 2019/20:
  - 1. To embed quality improvement into Trust leadership & governance
  - 2. To adopt and socialise a common and easy to use quality improvement methodology
  - 3. To provide tools and techniques to support staff in leading quality improvement initiatives
  - 4. To provide support, expertise and training in quality improvement
  - 5. To embed a quality improvement approach into day to day activities
  - 6. To reward and share good practice and evaluate progress.

## 4.0 Constraints

- 4.1 The Trust is in a period of financial recovery, and is not currently in a position to make significant new investment into dedicated resources for quality improvement. The plan outlined in this document is therefore constrained to the use of existing resources with little or no additional investment being required.
- 5.0 Governance
- 5.1 A quality improvement steering group will convene to oversee the development and implementation of this operational plan.

- The Workforce Committee and the Clinical Governance Committee will jointly oversee the Quality Improvement agenda and will receive regular progress updates.
- 5.3 Progress will be reported to the Board on a six monthly basis.
